Got a Vegetable Garden?

If you haven't, now is a good time to start!!!

Broccoli, Cauliflower, Cabbage, Silverbeet, & Pak Choy make Yummy Winter Crops.

Raised Beds are a great way to grow veges, as they save time and the veges grow faster... not to mention the benefits for your back! Tui have a new product with plastic heat-absorbing sides that clip together (no nails required). Fill it with compost then plant your veges.

It's almost too easy!

Handy Tip from Leigh:

Finish your bed off with *Pea Vine Hay*.

This stops the weeds & keeps the plants warm. They will also grow faster & healthier.

A ROSE BY ANY OTHER NAME...

We have a huge range of Roses with **over 100 varieties** coming this year, including some gorgeous new ones.

Roses look great in their own bed, or even planted amongst natives.

Fruit Tree Pruning Day - 4 July 2009:

Held in our own established orchard, with local orchardist **Charlie Owen**
Everyone Welcome to Attend

We are now stocking Dodsewells famous Delphiniums, all named & extremely healthy.

We also have the Yellow Clivia in stock, which is hard to find.

Get ready for Garlic and Shallots - they will be in store shortly and are very easy to grow. Plant around the shortest day (which is 21 June) and harvest around the longest day (which is 22 Dec).

Coming in June are our Fruit Trees. We have a big variety this year, including double & triple graft trees - a list of trees is available from the Greenhouse, or via email (just drop us a note). Currently in store we have a wide range of fruiting plants including blueberries, feijoas, persimmons, raspberries, tamarillos, gooseberries, and a good range of big healthy citrus.

Mixed Perennials

4 for \$20

We have a great range of Easy-to-Grow Perennials

Planting a Hedge? Check us out for price!
Buxus, Photinia, AkeAke, Corokia, Camellia, Pittosporums, Lavenders

From \$4.95 ea (10 or more for \$4.00 ea)

How about **Firewood?** We can source quality plants at very good value.
